EDUCATION

State University of Surabaya
Bachelor of Informatics Management

Surabaya, Indonesia
2023 – Present

EXPERIENCE

Independent Study – VR Office Simulation 2026
PT. Raja Teknik Solusi (MBKM Independent Study) Indonesia

- Developed an end-to-end Virtual Reality office simulation using Unity, delivering an interactive workplace experience featuring job interview and warehouse sorting scenarios.
- Created complete 3D office environments, interior assets, and fully animated NPC characters in Blender, then integrated them into Unity with XR Interaction Toolkit to build an immersive VR application.

Head of Research and Technology Department 2025
Himafortic Surabaya, Indonesia

- Led Innovation Lab coaching program for 100+ students in Web Development, Programming, and UI/UX Design
- Developed official website with automated scraping of competition information from Gemastik and Olivia
- Managed technology initiatives and research projects for the student organization

PKM 2024 Funding Recipient 2024
Ministry of Education, Culture, Research, and Technology Indonesia

- Received competitive government funding through the Student Creativity Program (PKM) for proposing BugHunter, a programming education game concept.
- Designed the initial solution concept, user flow, and low-fidelity prototype in Figma to communicate the proposed learning experience and gameplay mechanics.

PROJECTS

Infortic - AI-Powered Opportunity Platform | *Next.js, TypeScript, Tailwind CSS, Framer Motion, Python, Playwright, JavaScript* 2026

- End-to-end platform that automatically scrapes Instagram opportunities using AI extraction and displays curated competitions, scholarships, and internships.

Computer Lab Inventory System | *Go, Gin, Bootstrap, JavaScript, SQLite, PostgreSQL* 2026

- Web-based inventory management system for university computer labs with AI-powered OCR attendance logbook, device tracking, and course scheduling.

Personal Portfolio Website | *Astro, TypeScript, JavaScript, CSS, LaTeX* 2026

- Personal portfolio website with minimalistic aesthetic, bilingual support, audio visualizer, and automated LaTeX CV generator.

Innovation Lab Website | *Astro, Vue, TypeScript, JavaScript, Tailwind CSS, Anime.js, Axios* 2025

- Website for intensive coaching program preparing for Olivia and Gemastik competitions, with automated competition information scraping.

KanGen Wisata Tour Company Profile | *Astro, Tailwind CSS, TypeScript, JavaScript* 2024

- Company profile website for KanGen Wisata Tour travel agency featuring tour packages, fleet gallery, and WhatsApp-based reservation system.
